Portfolio: <https://portfolio-v2-three-red.vercel.app>

Turkey, Gaziantep

Full Stack JavaScript Developer with 4+ years of experience building dynamic, high-performance web applications. Specialized in Next.js for both frontend and backend development, with strong expertise in React, React Native, and backend optimization using Node.js and Express.js to create seamless user experiences.

Skills

- **Front-End Development:** Proficient in building dynamic, responsive, and SEO-friendly user interfaces using React, Next.js, and React Native. Experienced with prefetching and caching strategies using React Query for improved performance.
- **UI/UX Design:** Skilled in creating visually appealing and user-friendly interfaces with Tailwind CSS, Shadcn, and Material UI.
- **Third-Party Integrations & API Testing:** Experienced integrating applications with authentication providers (KindeAuth, Clerk, NextAuth) and other third-party services. Proficient in testing and documenting APIs using Postman.
- **Back-End Development:** Competent in designing and implementing robust APIs using Node.js, Express.js, or Next.js API routes, including real-time communication using Socket.IO.
- **Database Management:** Experienced with Prisma ORM and working with MySQL, PostgreSQL, and MongoDB for efficient data storage and retrieval.

Education

- **High School** 2018
 - Riyadh / Saudi Arabia
- **Iskenderun Technical University** 2025
 - Bachelor of Computer Engineering
 - GPA: 3.11
 - Hatay / Türkiye

Teck Stack

- HTML · CSS · JavaScript · TypeScript · React · Vite · Next.js · React Query
- Tailwind CSS · shadcn/ui · Framer Motion · React Native · Node.js · Express.js
- Prisma ORM · Firebase · AWS · Socket.IO · Vercel · Netlify · DigitalOcean

Experience

- Gezer Group, Remote

Nov 2024 – Present

 - Developed and optimized [isbul.net](#) from scratch, building all worker pages (CV forms, profiles) and company pages, including the company dashboard.
 - Created a real-time dashboard and messaging system using Socket.IO for live updates.
 - Integrated the project with a new backend, improving performance and scalability.
 - Implemented React Query for efficient data management and ShadcnUI for consistent, user-friendly interfaces.
 - Maintained and optimized [isbul.net](#) for better performance, debugging, and user experience.
 - Currently rebuilding [bakıcıbul](#) from scratch, implementing the full frontend architecture, reusable components, and real-time features.
- Uzability Studio, Remote

Jul 2024 – Dec 2024

 - Developed and enhanced official company websites and client projects, focusing on UI/UX-driven web development.
 - Built websites for client businesses, including: [TroikaProd](#), [Xpact](#), and [Rofouf](#).
 - Improved and designed user interfaces to ensure modern, responsive, and user-friendly experiences.
- Medyaness 360, Remote

Jan 2024 – Apr 2024

 - Optimized the front-end of an existing healthcare platform ([HealthTurkiye](#)) by improving UI design and integrating API requests.
 - Ensured smooth functionality and seamless user experience across the platform.
- Freelance Full Stack, On-site & Remote

Sep 2022 – Present

 - Worked with multiple clients, contributing to both frontend and backend development.
 - Developed and maintained backend functionality using Node.js, Express.js, Next.js API routes, and Next.js Server Actions for web and mobile applications.
 - Deployed and scaled applications on Netlify, DigitalOcean, Vercel, and AWS.
 - Managed databases with Prisma, including MySQL and MongoDB, optimizing data handling and storage.
